

# **AUTO1**

## **DETAILING & PAINT REPAIR**

### **'Thumbs up' to tackling youth unemployment.**

Debbie from Auto 1 wanted to spend more time working on her business rather than in it.

Finding the time to recruit the right staff was proving both time consuming and frustrating but she knew she needed to do something. David from IMPACT was able to help her by finding quality candidates that matched what Debbie was looking for in an employee. After interviewing the candidates, Debbie was torn between two of the young men. Both were very enthusiastic and extremely keen to break into the industry but she just couldn't make the choice. David was then able to show her how she could afford to hire both.

Government subsidies are designed to support small businesses like Auto 1 to get the staff they require. Debbie was thrilled to welcome both Marli and Zac to her team. The move has allowed Debbie to grow her business, reduce the time she spent working in it and she is even looking to hire again soon.

To speak to one of our Workforce Solutions Consultants such as David, contact IMPACT Community Services today on 4153 4233!

## Troy gets Coen going WYLD

Our Transition to Work team are dedicated to helping young people between the age of 15 and 21 on their journey to employment.

Troy has helped Coen in finding the right course for him and now he is days away from receiving his Certificate III in Rural Operations with WYLD Projects.

Coen is looking at securing paid employment within the Rural Operations/Horticulture industry. He has gained confidence which has inspired him to become a mentor for other young Indigenous Australians.

What is Transition To Work?

## Welcome our new GM - Corporate Services

May sees the introduction of our new General Manager for Corporate Services - Sue. Working extensively in the Finance and Information Management space over the past 30 years in varying industries, Sue has a great range of knowledge across Retail, Hospitality, Manufacturing and Agricultural sectors.

In the past 15 years, Sue played a major role in the Management systems function to provide support to Finance, Human Resource and Operations function by providing technology, communication and workflows to maintain administrative effectiveness, provide reporting and Compliance monitoring functionality to ensure attainment of effective, accurate processes within legislative frameworks.

Sue's primary focus has been the analysis, design and implementation of 'best practice' processes and achieving these outcomes through development support and coaching of individuals to optimise their potential to meet the challenges of constantly changing work environments.

We are excited to have Sue on-board!
